Contents

VOLUME 6, NUMBER 1, MARCH 1981

E. A. BERNAYS: A specialized region of the gastric caeca in the locust, *Schistocerca gregaria* 1–6

WOLFGANG EDRICH: Night-time sun-compass behaviour of honey bees at the equator 7–13

A. W. FERGUSON and J. B. FREE: Factors determining the release of Nasonov pheromone by honeybees at the hive entrance 15–19

C. J. HODGSON and I. R. LANE: Some effects of photoperiod on larviposition and fresh weight-gain in *Myzus persicae* 21–25

NICOLE JEANROT, RAYMOND CAMPAN and MICHEL LAMBIN: Functional exploration of the visual field of the wood-cricket, *Nemobius sylvestris* 27–34

WERNER LOHER and GOTTFRIED WIEDENMANN: Temperature-dependent changes in circadian patterns of cricket premating behaviour 35–43

E. PETER MASLER, MORTON S. FUCHS, BECKY SAGE and JOHN D. O'CONNOR: A positive correlation between oocyte production and ecdysteroid levels in adult *Aedes* 45–49

T. A. MILLER and K. S.-RÓZSA: Control of the alary muscles of locust dorsal diaphragm 51–59

DARRELL MOORE, JEFF PENIKAS and MARY ANN RANKIN: Regional specialization for an optomotor response in the honeybee compound eye 61–69

J. MURLIS and C. D. JONES: Fine-scale structure of odour plumes in relation to insect orientation to distant pheromone and other attractant sources 71–86

E. R. RUMBO: Study of single sensillum responses to pheromone in the light-brown apple moth, *Epiphyas postvittana*, using an averaging technique 87–98

D. S. SAUNDERS: Insect photoperiodism – the clock and the counter: a review 99–116

BOOK REVIEWS and BOOK NOTICES 117–119

VOLUME 6, NUMBER 2, JUNE 1981

V. P. WIGGLESWORTH: The natural history of insect tracheoles 121–128

D. G. APPLIN: Long-term effects of diet on the neuroendocrine system of the sheep blowfly, *Lucilia sericata* 129–134

JAMES BEAMENT and SARAH A. CORBET: Surface properties of *Culex pipiens pipiens* eggs and the behaviour of the female during egg-raft assembly 135–148

PETER B. BUCHAN and ROGER B. MORETON: Flying and walking small insects (*Musca domestica*) recorded differentially with a standing-wave radar actograph 149–155

GOTTFRIED FRAENKEL: Food conversion efficiency by fleshfly larvae, *Sarcophaga bullata* 157–160

D. GRAHAM and G. WENDLER: Motor output to the protractor and retractor coxae muscles in stick insects walking on a treadwheel 161–174

O. T. JONES, R. A. LOMER and P. E. HOWSE: Responses of male Mediterranean fruit flies, *Ceratitis capitata*, to trimedlure in a wind tunnel of novel design 175–181

D. MURALEEDHARAN and V. J. K. PRABHU: Hormonal influence on feeding and digestion in a plant bug, *Dysdercus cingulatus*, and a caterpillar, *Hyblaea puera* 183–189

D. E. PADGHAM: Hatching rhythms in the desert locust, *Schistocerca gregaria* 191–198

JOHN F. STOUT and FRANZ HUBER: Responses to features of the calling song by ascending auditory interneurones in the cricket *Gryllus campestris* 199–212

J. P. WARD: Mating behaviour and the mechanism of male orientation in the anobiid bread beetle, *Stegobium paniceum* 213–217

JAYANTHI P. WITANACHCHI and F. D. MORGAN: Behaviour of the bark beetle, *Ips grandicollis*, during host selection 219–223

D. MARSH, J. S. KENNEDY and A. R. LUDLOW: Analysis of zigzagging flight in moths: a correction 225

BOOK REVIEW and BOOK NOTICES 227–230

VOLUME 6, NUMBER 3, SEPTEMBER 1981

C. H. BELL: The influence of light cycle and circadian rhythm on oviposition in five pyralid moth pests of stored products 231–239

ANN CLOAREC: Effect on predatory performance of the presence of prey after moulting in the water stick insect, *Ranatra linearis* 241–249

JOSEPH C. DICKENS: Behavioural and electrophysiological response of the bark beetle, *Ips typographus*, to potential pheromone components 251–261

J. B. FREE, A. W. FERGUSON and J. A. PICKETT: Evaluation of the various components of the Nasonov pheromone used by clustering honeybees 263–268

C. GILLOTT and P. A. LANGLEY: The control of receptivity and ovulation in the tsetse fly, *Glossina morsitans* 269–281

S. L. GOLDSON: Non-reproductive determination of 'migratory' flight in Argentine stem weevils, *Listronotus bonariensis* 283–288

HANS-WILLI HONEGGER: Three different diel rhythms of the calling song in the cricket, *Gryllus campestris*, and their control mechanisms 289–296

DENNIS F. HOWARD and WALTER R. TSCHINKEL: The flow of food in colonies of the fire ant, *Solenopsis invicta*: a multifactorial study 297–306

M. D. R. JONES: The programming of circadian flight-activity in relation to mating and the gonotrophic cycle in the mosquito, *Aedes aegypti* 307–313

S. J. SIMPSON: An oscillation underlying feeding and a number of other behaviours in fifth-instar *Locusta migratoria* nymphs 315–324

J. P. WARD: A comparison of the behavioural responses of the haematophagous bug, *Triatoma infestans*, to synthetic homologues of two naturally occurring chemicals (n- and iso-butyric acid) 325–329

BOOK NOTICES 331–332

VOLUME 6, NUMBER 4, DECEMBER 1981

M. C. ARENDSE and A. BARENDREGT: Magnetic orientation in the semi-terrestrial amphipod, *Orchestia cavimana*, and its interrelationship with photo-orientation and water loss 333–342

MIECZYSŁAWA I. BOGUŚ and BRONISŁAW CYMBOROWSKI: Chilled *Galleria mellonella* larvae: mechanism of supernumerary moulting 343–348

P. D. COX, M. MFON, S. PARKIN and J. E. SEAMAN: Diapause in a Glasgow strain of the flour moth, *Ephestia kuehniella* 349–356

MARIE GOULET, RAYMOND CAMPAN and MICHEL LAMBIN: The visual perception of relative distances in the wood-cricket, *Nemobius sylvestris* 357–367

JIM HARDIE: The effect of juvenile hormone on host-plant preference in the black bean aphid, *Aphis fabae* 369–374

K. H. HOFFMANN, W. BEHRENS and W. RESSIN: Effects of a daily temperature cycle on ecdysteroid and cyclic nucleotide titres in adult female crickets, *Gryllus bimaculatus* 375–385

DAVY JONES, GRACE JONES and BRUCE D. HAMMOCK: Developmental and behavioural responses of larval *Trichoplusia ni* to parasitization by an imported braconid parasite *Chelonus* sp. 387–394

J. S. KENNEDY, A. R. LUDLOW and C. J. SANDERS: Guidance of flying male moths by wind-borne sex pheromone 395–412

K. L. LINDSAY and A. T. MARSHALL: The osmoregulatory role of the filter-chamber in relation to phloem-feeding in *Eurymela distincta* (Cicadelloidea, Homoptera) 413–419

C. E. LINN, JR and W. L. ROELOFS: Modification of sex pheromone blend discrimination in male Oriental fruit moths by pre-exposure to (*E*)-8-dodecenyl acetate 421–429

JAMES H. MARDEN and KEITH D. WADDINGTON: Floral choices by honeybees in relation to the relative distances to flowers 431–435

G. F. O'MEARA and L. P. LOUNIBOS: Reproductive maturation in the pitcher-plant mosquito, *Wyeomyia smithii* 437–443

KEIKICHI UCHIDA and KATSUHIKO SUZUKI: Elimination of protein-food ingested into the crop, and failure of ovarian development in female mosquitoes, *Culex pipiens pallens* 445–450
